

LIUNA NORTH DAKOTA

SKILLED. SAFE. LOCAL.

LIUNA North Dakota is the leading provider of skilled construction labor on pipeline, power plant, highway, and building construction projects in the Bakken and Three Forks area. Some of the largest and most complex projects ever undertaken in North Dakota—including the Alliance and Keystone pipelines—were completed with the help of LIUNA members. We work hard every day so construction owners like Enbridge, Hess, MDU, Sanford Health, and the North Dakota Department of Transportation can have projects built on time, on budget, and without injuries.

The benefits LIUNA and our contractor partners can offer to construction owners include:

- Compression of project timelines with a workforce that is trained to avoid mistakes, maximize efficiency, and work as a team
- Safety programs designed to lower insurance costs, avoid injuries, and save lives
- Help building public support for job-creating projects and investments in critical infrastructure and responsible development of energy resources.

LIUNA North Dakota serves the needs of members, contractor partners, and construction owners by providing flexible workforce solutions; competitive health and retirement benefit programs; and world-class skills and safety training. No one works harder than our members in the field. And no one fights harder than LIUNA to support job-creating energy projects such as Keystone XL, Sandpiper, and new LNG export terminals.
